

Seven-excle semi-logarithmic representation of range, mode, and mean for some elements from 127 stream sediment samples in the Himma Quadrangle, Maska. Chart includes samples from this report, and Detterman and Reed (1965, open-file report). Chart does not include pan concentrate of samples 67 and 68 (Detterman and Reed, (965). Arrows at base of chart denote zero mode. The number of samples in which zero-mode elements were detected is: Ag, 9 (-0.7 considered as 0.7). B, 52. La, 5. Mo, 11: Nb, 37: Pb, 13.
